

Telford Homes wins Best Sustainability Report

We are delighted to announce Telford Homes has won the Best Sustainability Report at the CorpComms Magazine Strategic Comms Award 2021 - our second sustainability focused award in the space of two weeks!

The Strategic Comms Awards, launched by CorpComms Magazine, recognises excellence in corporate storytelling, with Telford Homes awarded for our 'creating sustainable communities' report. As you all know, sustainability is at the heart of everything we do, and we worked alongside [Luminous](#) to create our first interactive report which showcased our Sustainability journey over the past year, *Building a Living Legacy Strategy* and our goals for our 2030 Roadmap.

This follows last week's announcement that Telford Homes was ranked as the UK's most sustainable housebuilder for the second year running in the 'Next Generation' housing benchmarking report 2021.
